

## **VEGETATIVE DEBRIS RESULTING FROM STORM DAMAGE**

When there is vegetative debris on a residential lot as result of a storm the following shall apply:

The clean-up of vegetative storm debris and the storage of this debris in a jurisdictional area for less than 14 days would be allowed without a permit. Every effort should be made by the property owner to keep the debris out of any resource area. All stacked and stored debris not removed within the 14 day time frame would be subject to permitting under the Commission's SOP on vegetative debris in a jurisdictional area. Further, this provision does not extend to vegetative debris that does not constitute storm debris placed in a jurisdictional area and only applies to debris from the same property. The 14 day time frame shall commence when the Commission/Agent becomes aware of the situation.

If the owner wishes to remove trees that did not fall as a result of a storm, said removal must be permitted in accordance with the Spencer wetlands by-law.
